

Electro Contact Cleaner

Cleans and degreases electrical or mechanical components

WEICON Electro Contact Cleaner is a special cleaner for the fast and effective cleaning and degreasing of all kinds of soiled or corroded contacts. It was specially developed for the cleaning of electronic and mechanical components. The special formula with high-purity solvents removes oxide/sulphide layers, combustion residues and resinous or sooty soiling. WEICON Electro Contact Cleaner reduces voltage loss and increases electric conductivity. Contamination that can cause surface leakage current is removed. WEICON Electro Contact Cleaner can be used on electrotechnical or mechanical components, such as electrical machines, measuring instruments, tools, balances, switches and sensors or electrical connections, contacts, relays and switchboards.

Technische Daten

Odour	solvent
Colour	colourless, transparent
Specific properties	ultrapure mixture of solvents
Silicone-free	yes
AOX-free	yes
ISSA Code	53.402.22
Shelf life	24 mon.

Processing

Before using on electrical equipment, first disconnect from the mains and wait a few minutes until the electrical voltage in the equipment has dissipated. Spray the part to be cleaned from a distance of 25-30 cm. Electro Contact Cleaner evaporates very quickly and does not leave any residues. Brushing or wiping supports the cleaning effect. The equipment may only be put into operation after the propellant and cleaning agent have completely evaporated.

Storage

Pressurized container. Protect from direct sunlight and temperatures above +50°C.

Safety and health

When using WEICON products, the physical, safety-related, toxicological and ecological data and regulations in our safety data sheets (www.weicon.com) must be observed.

Available sizes:

11210400 Electro Contact Cleaner, 400 ml, colourless, transparent

Note

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation. We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.
